

QUESTIONS AND ANSWERS

Q. What causes a ground swell?

A. A ground swell occurs frequently along a coast where the water is shallow for a long distance from the land. It is due to deep water disturbances from heavy winds. The swell or roller breaks when it reaches the shallow and forms a series of breakers, smoothing down again before reaching shore if the first is of great extent.

Q. What was the real name of Bertha C. Clay?

A. Bertha C. Clay was the pseudonym of Charlotte Bremer.

Q. What is kasha?

A. This is a soft clay of variable, but usually low, plasticity. Burning to a pure white color, and is of a high refractive index. The chief use of kasha is for the manufacture of white earthenware and porcelain. It is also used for wall tiles, being mixed with varying amounts of quartz, feldspar, and ball clay.

Q. How many different sounds has the letter 'w'?

A. It has approximately nine distinct sounds as in name, wash, water, wait, wax, village, class, west, etc.

Q. Why is snow white?

A. Two whitenesses of snow result from the fact that the snow crystals are so minute that they scatter all the colors of the spectrum, and the combination of all colors is white. The whiteness of snow is also due to the fact that it is composed of innumerable tiny facets.

Q. Did the Thirty Tyrants rule over all Greece?

A. No, they ruled only the city of Athens.

Q. Three men appointed rulers of the city of Athens by their Spartan conquerors, at the close of the Peloponnesian war in 404, B. C. were Alcibiades, but were among the few who favored an oligarchy rather than a democracy.

Q. What is meant by "tweedledee" and "tweedledum"?

A. This is an old expression employed to denote the fact that there is no appreciable difference between two important points. Much ado about nothing conveys much the same idea.

Q. What determines the pitch of the voice?

A. The pitch of voice is determined by the length of the vocal cords. These cords are shorter in women than in men, therefore the former have higher voices.

Q. Can you tell me what chemical preparation is used for bleaching to give color ornamental glasses?

A. The following is a formula for bleaching glasses: Potassium dichromate and make a paste with water; plaster thickly on the glasses, and put in the fire to dry; when dry brush off the sulphur.

Q. Which state elected the most women to its legislature?

A. The National American Woman Suffrage association says that Connecticut elected five women to its general assembly, Kansas came next with four, California and Utah, three, and New Hampshire, New Jersey and Oklahoma, two each. Several states elected one woman, 27 women being elected to serve in the legislatures of 41 states.

Q. What is Corbion leather?

A. Corbion leather is a soft, floor-covering material of a long time chiefly manufactured at Corbion, a suburb of London, and dressed in a made of pigskin and fine horsehair.

Q. How many different words are in the Bible?

A. The fact that the Bible has had such great influence upon literature is due to the fact that it had a large vocabulary. A tabulation of the words in the King James version shows that about 8,000 words are used, while Milton used about 15,000 and Shakespeare 21,000.

Q. Where is Jefferson Davis buried?

A. Jefferson Davis died on December 23, 1893, and was buried in New Orleans. In 1897 the body was moved to Richmond, Va.

Q. What city is called "the city of spades"?

A. New Haven, Conn., is so known, but the name is disappearing. Its streets are still shaded, however, by more than 25,000 trees.

Q. What was the name of the native population of Heilgoland during the war?

A. The natives of the island of Heilgoland at the beginning of the war were expelled at six hours' notice, and sent to Hamburg and Jena. They were kept under police supervision. These people have since been permitted to return to their homes.

Q. How many St. Mary's colleges are there in the United States?

A. St. Mary's colleges, there are 111 educational institutions, including seminaries and schools of nursing, which are named for St. Mary.

Q. What is the origin of the word "pulpit"?

A. Any arched or declamatory sounding in acoustical inflection has been given this designation. The first famous pulpit of this sort was a wooden structure in the cathedral of Philip, king of Macedonia. The name was applied first to the pulpit of Cicero against Mark Antony.

Q. How high are the tallest telephone poles?

A. The tallest telephone pole ever built was on West street, New York city, with poles 30 feet long, and carrying as many as 25 cross-arms.

Q. Why water was and the answer to my question by writing The Herald Information Bureau, Frederic J. Haskin, director, Washington, D. C. The bureau seems to give advice on legal, medical and financial matters. It does not attempt to solve domestic troubles, but by scientific exhaustive research on any subject. Write your questions plainly and briefly, full name and address and enclose two stamps for return postage. All replies are sent direct to the inquirer.

Colonel In Stamp Selling Army Captain In Red Cross, Aged 9

By FRANCES DICKSON.

NINE years old and a colonel in the War Savings Stamp army, Miss Briest, who was a captain in the American Red Cross and both honors were awarded little Miss Briest Armstrong, daughter of Mr. and Mrs. W. H. Briest, of El Paso, when she was seven years of age. In recognition of her record of selling more than 100 stamps than any other child in the United States.

While living in San Francisco and including some sales made in Los Angeles, she sold more than 100 stamps worth of thrift stamps during the war. Another form of patriotic service in which she excelled was in the collecting of tin cans for the Red Cross was turning a call for such material. Briest succeeded in obtaining more than 100 pounds of tin cans every week for four months. It was her Red Cross captain's commission.

Worked as a Soldier's Kitchen.

Too small to make much headway by walking, she donated roller skates. When her mother came to the city, Briest showed to his side, slipped her small hand hesitatingly into his and pulled him to her. She was a fall from his package of cigarettes, gum or tobacco. He might just as well have given her a box of soap, for with her hair she was able to keep pace with his long strides and she hung on until he gave up. Not that many of them required much persuasion. It would be a man of that who could resist Briest in her battered trench coat, given to her by a veteran of the Sixth Engineers, and worn with the greatest pride. And a little head of hair, also one of her treasures, in a British army coat, and was out down to fit her when she received it as a tribute from a soldier.

Had Help to Make Change.

Briest's tireless energy and original method of attack helped her make her record. She was a duty every day. Usually she was accompanied by a change-maker, though she was perfectly capable of making her own change when she was not too rushed. Otherwise, her record is of her own making. She became so widely known in San Francisco that many of her customers were regular ones and returned to buy their thrift stamps from anyone other than Briest Durham.

Aside from her war-time record, she has other claims to honor. She is a motion picture actress of no small

MISS BRIEST ARMSTRONG DURHAM.

FACIAL MASSAGE

By EDNA KENT FORBES

Paris, November 4.

There is one thing that is done extraordinarily well in Paris. That is the facial massage. I suggest that it accounts for the clear complexion of many Parisians since the women here are not so fond of outdoor exercise as either the English or the Americans.

The "patient" is seated most comfortably in an arm chair, the hair is back and bound up with soft bands so that no oil can touch it. In most cases the massage is done with cream though in the case of very oily skin talcum powder is used. This is simply to make it easier to work over the skin with the fingers.

The face is first washed then the oil is rubbed in. The massage begins with the forehead, the operator working behind the patient. The thumbs are held under and in front of the ears, the fingers making slight movements from the middle of the forehead to the temples, and from the temples to a line going over the eyes and nose.

The nose is massaged with the thumbs held in the same position, with two fingers of each hand used to stroke the nose from between the eyes to the nostrils, and from the nostrils out over the cheeks. Then the cheeks are massaged, the operator using his thumb on the cheekbone, coming directly under the chin, and the fingers massage from the jawbone and going towards the nose, which wrinkles and relaxed cheeks are to be improved. This is different from our method, for we usually make that movement from the center of the chin over the mouth and out towards the ears.

The chin is massaged by stroking from the neck up and out under the jawbone.
